

# MIO-400

## CONVENTIONAL INPUT / OUTPUT MODULE

The **MIO-400** module is used to supervision and control of fire protection equipment or fire protection systems and other devices.

It is designed to operate in the detection line of the **ACSP-402** addressable fire alarm control panel.

- 4 inputs:
  - selection of input polarity: NO or NC,
  - programmable input type,
  - detection of short circuit or open circuit.
- 4 relay outputs:
  - programmable output type,
  - capability to control electrical devices powered with 230 VAC,
  - resistive, inductive or capacitive load switching.
- Double-sided short-circuit isolator.
- Power from the detection line.
- LEDs to indicate:
  - input state,
  - output state,
  - faulty input,
  - faulty module.
- Mountable on 35 mm DIN rail.

## TECHNICAL DATA

Operating temperature range	-10°C...+55°C
Weight	225 g
Maximum humidity	93±3%
Dimensions	122 x 93 x 58 mm
Current draw when detecting	600 µA
Current draw when emitting an alarm	750 µA
Power supply voltage	18...26 V DC
