

APB-200

WIRELESS PANIC BUTTON

APB—200 is a wireless panic button used to trigger a panic alarm or call for help. It can also be used to control various devices (e.g. automation or access control system devices). It is designed to work within a two–way wireless **ABAX 2** system.

- encrypted two-way radio communication in the 868 MHz frequency band (AES standard)
- diversification of transmission channels 4 channels allow automatic selection of one that guarantees transmission without interference with other signals in the 868 MHz frequency band
- remote button firmware update
- remote configuration
- ECO option enabling extension of battery life
- battery status check
- LED for easy button testing
- tamper protection against opening the enclosure and against detaching it from its mounting surface

APB-200 is controlled by:

- ACU-220/ACU-280 controller
- ARU-200 retransmitter

TECHNICAL DATA

| Battery working time (in years) | up to 2 |
|--|-------------------|
| Operating temperature range | -10°C+55°C |
| Max. current consumption | 18 mA |
| Weight | 73 g |
| Maximum humidity | 93±3% |
| Operating frequency band | 868,0 ÷ 868,6 MHz |
| Battery | CR14250 3V |
| Standby current consumption | 55 μA |
| Dimensions | ø97 x 29 mm |
| Radio communication range (in open area) for ACU-220 | up to 2000 m |
| Radio communication range (in open area) for ACU-280 | up to 1200 m |
