INT-SF-W PARTITION KEYPAD

The INT–SF–W partition keypad allows you to control operation of each alarm system based on the control panels of INTEGRA and INTEGRA Plus families. To maintain a uniform design line of the controls, it is recommended that the INT–SF partition keypad be used in alarm systems including the INT–KLFR, INT–TSI, INT–TSH2, INT–TSG2 and INT–KSG keypads.

- white color backlight
- controls single partition in the system
- PANIC, FIRE and AUX alarms triggered from keypad
- LEDs for partition status indication
- buzzer for acoustic signaling of selected system events
- access control functions
- relay for electromagnetic lock / electric strike control
- door status monitoring input
- available in white (INT–SF–W), black (INT–SF–B), light with silver frame (INT–SF–SSW), dark with silver frame (INT–SF–BSB) and white with silver frame (INT–SF–WSW)
