

# ROP-101/EU

## CONVENTIONAL MANUAL CALL POINT (EXTERNAL)

Manual call points enable the notification of a detected fire to persons present in its vicinity and the activation of a fire alarm.

- hermetic and durable casing which can be installed outdoors
- full conformance with the requirements of EN54-11
- mechanical detection memory
- reusable access panel facilitating system maintenance
- LED signalling on detection of fire
- special reset key which can be used after the activation of the manual call point

### TECHNICAL DATA

Enclosure dimensions	87 x 87 x 57 mm
Operating temperature range	-25...+70 °C
Supply voltage	9...30 V DC
Standby mode current consumption	0 mA
Max. current consumption	41 mA
Weight	214 g
Maximum humidity	75%
IP rating	IP66 <sup>1</sup>

<sup>1</sup> Feature not confirmed during the process of assessment and verification of constancy of performance carried out by the Scientific & Research Centre for Fire Protection - National Research Institute (CNBOP-PIB) – feature confirmed in additional tests.
